The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-12 and 14 are indefinite as to "increasing cheese yield" as it is not clear what is encompassed by this phrase. The use of "increasing" does not set limits on the claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Picon et al (Biotechnology Letters) for the reasons set forth in rejecting the claim in the last Office action.

Picon et al teach a process for producing cheese (e.g. Manchego) comprising the addition of phospholipase C in the amounts claimed to a conventional cheese making process (see entire document, especially the abstract and the Materials and Methods).

Claims 1-11 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Picon et al (Biotechnology Letters).

Picon et al teach a process for producing cheese (e.g. Manchego) comprising the addition of phospholipase C in the amounts claimed to a conventional cheese making process (see entire document, especially the abstract and the Materials and Methods). Picon et al also teach cow's milk as an option (see page 347, column 2).

The claims appear to differ as to the specific recitation of increasing yield.

A yield increase would be no more than inherent and/or obvious to that of Picon et al as the same components and process steps are used.

Applicant's arguments filed May 20, 2009 have been fully considered but they are not persuasive.

Applicant argues that Picon et al does not teach a process for increasing cheese yield.

In response to applicant's arguments, the recitation "increasing cheese yield" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the

purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

It is further noted that Applicant neither excludes additional components of Picon et al nor provides evidence to establish unexpected results.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
